

# Generating a report on different types of prompt Slots

**Aim:**

To write prompts for:

- Comparative Analysis Prompt
- Experiential Perspective Prompt
- Everyday Functioning Prompts

---

**Scenario:**

You are planning to buy a new smartphone for daily use. You want a phone with long battery life, a good AI-powered camera, and smooth performance for social media, online classes, and entertainment. You are confused between two smartphone models and want to compare them and understand how they help in daily life.

---

 **1. Comparative Analysis Prompt**

**Prompt 1:**

Compare Smartphone A and Smartphone B in terms of battery life, AI camera quality, performance, and price. Which smartphone is better for daily use?

**Response:**

| Feature     | Smartphone A                            | Smartphone B                            |
|-------------|-----------------------------------------|-----------------------------------------|
| Battery     | 5000 mAh, ~2 days                       | 4500 mAh, ~1.5 days                     |
| Camera      | AI scene detection, sharper night shots | Natural tones, less detail in low light |
| Performance | Moderate, budget-friendly               | Faster processor, smoother gaming       |
| Price       | More affordable                         | Higher cost                             |
| Best For    | Battery life, cost efficiency           | Performance-heavy users                 |

Smartphone B is better for performance-heavy users, while Smartphone A is better for battery life and cost efficiency.

---

**Prompt 2:**

Compare two smartphones based on camera performance, battery efficiency, and processing speed. Which one is more suitable for students?

**Response:**

| Feature         | Smartphone A                           | Smartphone B                            |
|-----------------|----------------------------------------|-----------------------------------------|
| Battery         | 5000 mAh, longer usage                 | 4500 mAh, shorter usage                 |
| Camera          | Stable, good for notes & classes       | Natural tones, less detail in low light |
| Performance     | Moderate, reliable                     | Faster processor, smoother multitasking |
| Student Benefit | Longer class sessions without charging | Better multitasking between study apps  |

Smartphone A is more practical because it ensures longer usage without charging interruptions during classes

---

 **2. Experiential Perspective Prompt**

**Prompt 1:**

As a college student, describe how using a smartphone with long battery life and an AI-powered camera improves your daily experience.

**Response:**

As a college student, having a smartphone with long battery life means I can attend online classes, browse study materials, and use educational apps throughout the day without worrying about charging. The AI-powered camera helps me capture clear notes, documents, and lecture slides instantly, making revision easier. It also allows me to take high-quality photos during college events, improving my overall student experience.

---

**Prompt 2:**

From the perspective of a working professional, explain how a high-performance smartphone helps in daily productivity and communication.

**Response:**

From a working professional’s perspective, a high-performance smartphone ensures smooth handling of emails, video meetings, and work applications. It allows quick communication with colleagues through messaging apps and supports multitasking without lag. The strong

battery life ensures uninterrupted work during travel or meetings, making daily productivity more efficient and reliable.

---

### 3. Everyday Functioning Prompt

#### **Prompt 1:**

Describe how smartphones with AI cameras and long battery life are used in everyday activities like online classes, photography, and social media.

#### **Response:**

Smartphones with AI cameras and long battery life are widely used in daily life for attending online classes without interruptions, capturing high-quality photos for personal or academic use, and staying active on social media platforms. The long battery ensures continuous usage throughout the day, while AI features improve image quality automatically, making everyday tasks easier and more efficient.

---

#### **Prompt 2:**

Explain how smartphones support daily life activities such as communication, navigation, entertainment, and productivity.

#### **Response:**

Smartphones play a key role in daily life by enabling instant communication through calls and messaging apps. They provide GPS navigation for travel, streaming services for entertainment, and productivity tools like calendars, notes, and cloud storage. These features make smartphones essential for managing both personal and professional tasks efficiently.

---

#### **RESULT:**

Prompts and corresponding responses for Comparative Analysis, Experiential Perspective, and Everyday Functioning based on the smartphone scenario have been successfully generated.
